

Protective Papers and Films

# Protex 10V

**PROTEX 10V** is a 10 mil latex saturated paper, which has a vinyl coating on one side to increase its abrasion resistance. It can be used in the protection of acrylic and polycarbonate windows, canopies and windshields. It can also be used for bare metal and painted surface protection where added abrasion resistance is required. A liner allows the product to be die-cut if desired.

*\*This product is not intended for fly-away applications. Test prior to use on copper, brass or anodized aluminum or before outdoor exposure.*

## BACKING:

Basis wt., lbs./3,000 sq. ft.	80 - 100
Thickness, mils	9 - 12
Tensile strength, lbs./inch, M.D.	35-45 min.
Elongation, % M.D.	3.0 min.
Elmendorf Tear, grams, MD	229 min.

## ADHESIVE:

Base	Natural Latex
Adhesion to steel, oz./in. width <i>(At time of manufacture)</i>	30 - 40 (-5/+7)
PSTC-1 (Modified)	Silicone Free

**LINER:** Flat

**STORAGE:** Shelf life is 1 year if stored in a cool dry place, out of direct sunlight.
