

Protective Papers and Films

Protex 50

Protex 50 is a 4-5 mil latex saturated paper. It is used for protection of various metal and painted surfaces to reduce surface damage due to scratches. It can be left on the surface during fabrication and forming operations. The material is self-wound for ease in machine application to flat surfaces. Paper is printed in red "**SCRATCHES CAUSE REJECTIONS - HANDLE WITH CARE**".

**This product is not intended for fly-away applications. Test prior to use on copper, brass or anodized aluminum or before outdoor exposure.*
